Save the Children

From the Real Economy to Social Engagement

EOS Investment Management with Save The Children for the GLOBAL CAMPAIGN 2016 - EVERY LAST CHILD to save excluded children and secure them a brighter future.

For this Christmas, EOS Investment Management decided to commit its efforts to this important campaign, trusting that investing in the future means, above all, to give a chance to a brighter future to those who currently do not have one. Millions of children are still excluded from access to life-saving healthcare and quality education due to poverty, inequality and discrimination.

Worldwide, there are 58 million out-of-school children, losing any hope of having a dignified future. In Italy, there are more than 1 million children living in absolute poverty, without the essentials to grow and to learn. It is hard to believe these are concrete numbers. Yet, they are real numbers!

The Every Last Child campaign aims to save excluded children and secure them a brighter future, in Italy and throughout the world.
